Attention!

The control device (chip) is attached to the back of the plate. Without the numbered plate, your time cannot be controlled, so no medal or Finisher diploma will be awarded and it will not be registered for future editions.

STARTING BOXES

The assignment of the number and its color is linked to the best certified time in the last three editions and this will determine the starting order. The start of the Quebrantahuesos (08:00 hours) is divided into seven starting boxes. After these boxes, the Treparriscos participants will be placed, leaving at approximately 08:45 hours (after the quebrantahuesos).

Attention!

Individual placement on each box will be done on a first-come, first-served basis. Placing yourself on the wrong box, better to the one that corresponds, is a serious infraction with the consequent disqualification and exclusion for life from the event.

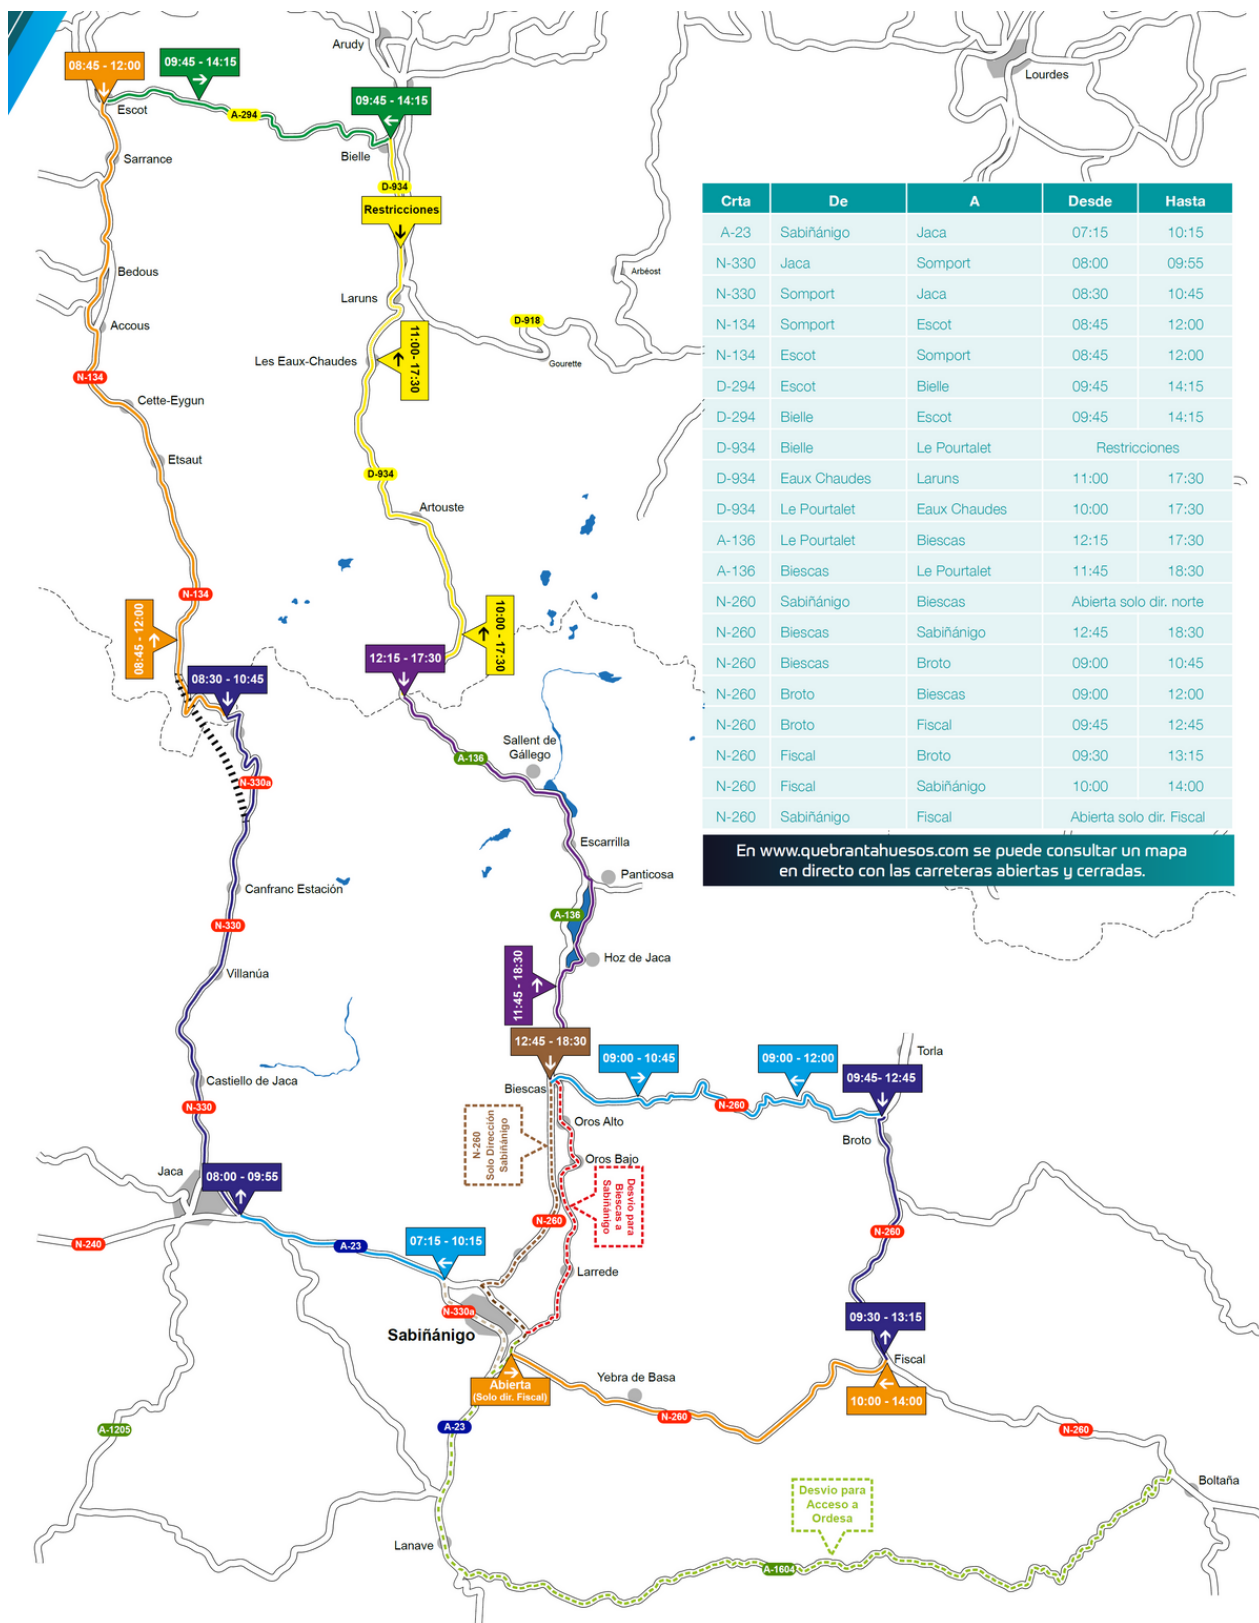

Drawer opening hours: 07:00h

Exceptionally, in this 2021 edition, the boxes will be distributed in addition to colors, by blocks of 500 in 500 cyclists by Covid Protocol. The start of each box will be made with an interval of two minutes between the last runner who crosses the finish line of the previous box and the first runner of the next.

A team of professional photographers will be stationed at different parts of the tour to take photos. A few days after the event, you will be able to find your photos on the [Sportograf website](http://Sportograf.com).

Tips to keep in mind to get as many photos as possible:

1. Put the number of the bicycle very visible.
